

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering a regressive system, people like myself make few long distance calls but would pay the same as people or businesses that make many calls. Low-volume customers would bear the same universal service fund burden as a high-volume business customers. This is unfair!

As a senior I use my wireless phone primarily for safety and security. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

Robert Katz
